

# THE COST OF TECHNOLOGY

3 in 4 organizations believe their technology costs too much and is not adding the value they had hoped.

> \$1T

The global cost of technology to businesses is over **1 Trillion Dollars**.

## TOO MUCH TIME

**Evaluating, purchasing, and implementing** technology has significant costs, often much greater than the upfront costs of hardware and software.

## MAINTENANCE COSTS

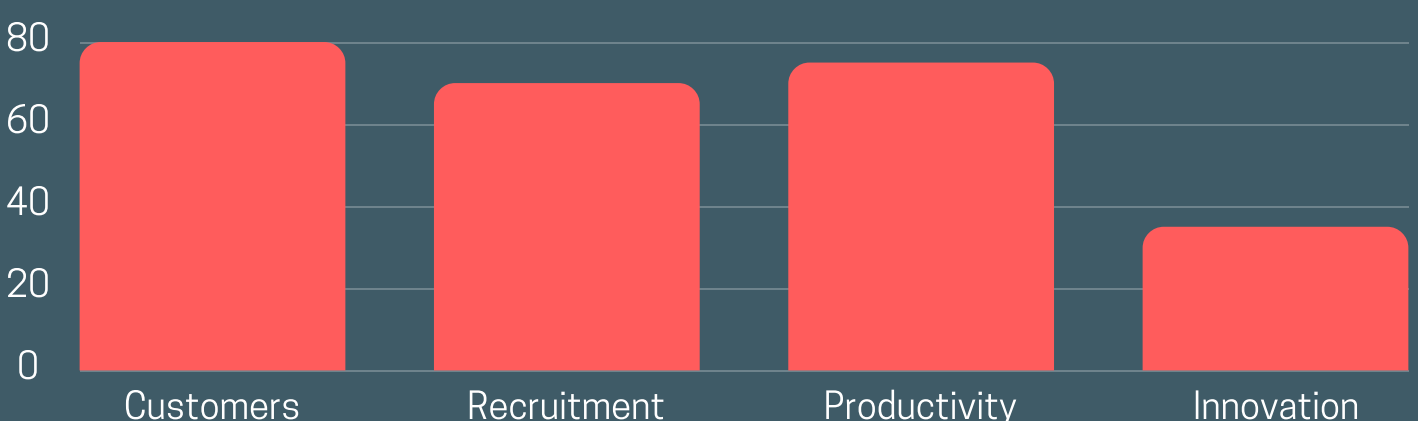

**Patching, updating, and securing** technology infrastructures is a costly effort. Valuable time from your key resources is monopolized with just keeping the lights on, robbing your business of higher-value services.

## SUPPORT COSTS

Whether it is opportunity cost of your internal support team that could be working on higher-value technology initiatives, or an expensive out-sourced managed services contract, the results is **you are paying too much** to support your technology environment.

## OPPORTUNITY COSTS

# BENEFITS OF Qube<sup>®</sup>

## IT AS A SYSTEM<sup>™</sup>

When you build IT as a System it costs less, performs better, is more reliable, and is more secure.

**↓90%** 

Reduced complexity,

**↓ COMPLEXITY = ↓ COSTS AND ↑ UPTIME**

## AUTOMATIC UPDATES

Your infrastructure is constantly updated with new features and capabilities, improving value and reliability over time.

## REALTIME SECURITY

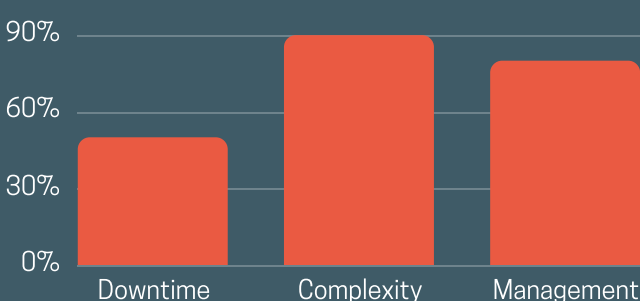

Security is a game of seconds. Keeping your entire infrastructure secure end-to-end is a massive challenge on your own. Qube<sup>®</sup> updates your environment as a system, meaning when one item is patched, your entire environment is patched.

## IMPROVED PRODUCTIVITY

Better reliability, better performance, better collaboration. It's a recipe for a more effective and efficient team. Qube<sup>®</sup> enables your technology to serve your business, not the other way around.

## COSTS REDUCED

## VALUE CREATED
